### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Oommen et al, U.S. Patent No. 6,645,404 (i.e. the parent application of the instant invention), claims an electrical insulating fluid comprising at least 75% of high oleic acid triglyceride composition comprising fatty acid components of at least 75% oleic acid, less than 10% diunsaturated fatty acid component C16-C22, less than 3% triunsaturated fatty acid C16-C22 component, less than 8% saturated fatty acid component C16-C22, and 0.1-3% of an antioxidant additive (see claims 1-26 of Oommen et al, U.S. Patent No. 6,645,404). The instant claims differ from the claims of Oommen et al, U.S. Patent No. 6,645,404, in that the instant claims specifically require 0.1-3% by weight of an antioxidant additive comprising both an alkylated diphenylamine and one or more antioxidant compounds selected from the group consisting of BHT, BHA, TBHQ, and combinations of, that is not claimed in Oommen et al, U.S. Patent No. 6,645,404. Therefore, the examiner asserts that a Terminal Disclaimer over Oommen et al, U.S. Patent No. 6,645,404, is no longer needed.

Accordingly, the claims viewed as a whole would not have been obvious to one of ordinary skill in the art at the time of the invention after viewing the prior art of record.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
